

# Adobe Photoshop Lightroom CC

Easily create amazing photos for your business anywhere you are.

Get everything you need to edit, organize, store, and share photos across desktop, mobile, and web with the cloud-based Adobe Photoshop Lightroom CC. And it's part of Adobe Creative Cloud for teams, so you always get the latest features and updates as soon as they're released.

## Key features

### Anywhere editing

Create photos that look just the way you want with easy-to-use tools like sliders and filters. And you can edit your full-resolution photos anywhere—on mobile devices, the web, or your desktop. Edits on one device are automatically applied everywhere else.

### Smarter organization

Save time locating shots of your product packages or your executive team. Adobe Sensei uses machine learning to recognize the people and other content in your photos and then applies searchable keywords. Auto-tagging makes searching a snap, so you can create albums based on any person or theme you want.

### Worry-free storage

Access your entire library of full-resolution photos anytime you want, anywhere you are, from any device.

### Easy sharing

Share your photographs with colleagues, clients, or an even bigger audience. Post photos directly to your company's social sites, or share albums on the web.
